EXAMINER'S AMENDMENT

1. Claims 1, 4-10, 13-17 and 28-32 are pending in the current application.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert M. Asher on October 19, 2005.

The application has been amended as follows:

- I. In the specification, line 9, replace "Application No. XX/XXX,XXX" with -- U.S. Patent No. 6,832,379 --; and
- II. In the specification, line 12, replace "Application No. XX/XXX,XXX" with -- U.S. Patent No. 6,671,705 --.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not expressly teach or render obvious the invention as recited in independent claims 1,6,10 and 15.

The combination of Saulpaugh and Russell teaches a message passing service [col. 11, lines 7 – 40 of Saulpaugh] providing asynchronous [col. 12, lines 49 – 65 of

Saulpaugh] and synchronous communication [col. 11, lines 7 – 40 of Saulpaugh] and session control logic [col. 9, lines 57 – 65 of Russell]. However, Saulpaugh and Russell does not teaches session control logic operably coupled to open a message passing session over a conduit to allow communications with any of a plurality of target applications that have an open message passing session on the conduit and providing synchronous and asynchronous message passing over the message passing session. Further, the prior art of record does not teach synchronous message sending logic to block the client application upon sending a synchronous message to one of the at least one target applications over the message passing service session and unblock the client application upon receiving a confirmation from the one of the at least one target applications over the message passing service session as recited in independent claims 1 and 10. The prior art of record does not teach sending logic programmed to send an asynchronous message to a target application and notify the client application via the asynchronous signaling logic upon receiving a confirmation from the target application over the message passing service session as recited in independent claims 6 and 15.

In addition, the prior art of record does not provide a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made would have integrated or modified the message passing service with session control logic operably coupled to open a message passing session over a conduit to allow communications with any of a plurality of target applications that have an open message passing session on the conduit and providing synchronous and asynchronous

message passing over the message passing session as recited in the context of the independent claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
